EDUCATION

Masters of Science in Computer Science

University of Texas at Dallas | Data Science Track

April 2025 – May 2026

Richardson, TX

Bachelor of Science in Computer Science

University of Texas at Dallas

August 2022 – May 2025

Richardson, TX

SKILLS

Languages: Python, C/C++, Java, Scala, C#, JavaScript, TypeScript, HTML, SQL, TensorFlow, React, React Native, Angular

Other Technical Skills: MongoDB, Postman, Git, AWS, Azure, Node.js, ASP.NET, Flask, PyTorch, Docker, Kubernetes, ML

Significant Courses: Adv. Algorithms & design, Big Data Mgmt., DB Design, OS Concepts, Software Engineering, Artificial Intelligence, Machine Learning, Natural Language Processing, Statistical Methods in Data Science

EXPERIENCE

Handshake AI | Python, Java, Pandas, NumPy TensorFlow, PyTorch, Scikit-learn

Sept 2025 – Jan 2026

Software Engineering AI Fellow (Contractor)

San Francisco, CA

- Developed Python-based pipelines to validate and improve models designed to speed up software engineering workflows by 20%
- Identified software-related errors in LLM-generated responses and developed data-driven improvements to improve reliability by 25%.

Paycom | React, C#, PHP, SQL, Docker, RabbitMQ, Kubernetes

May 2025 – Aug 2025

Software Engineering Intern (Full Time)

Irving, TX

- Containerized backend components and worker services with Docker to increase scalability and improve efficiency by 60%.
- Transitioned a blocking workflow into an asynchronous process with a message broker and RabbitMQ to separate components.
- Researched Kubernetes to look into ways to scale containerized workloads and manage background processing infrastructure.

Optimal Blue | AngularJS, .NET, Microsoft Azure, SQL

Sept 2023 – May 2025

Software Engineering Intern (Part Time)

Plano, TX

- Used C# and Typescript to build a friendly UI for Excel uploads and downloadable files with error messages, reducing user errors by 40%.
- Improved solution functions through detailed API and endpoint upgrades, resulting in a 20% increase in system performance.
- Used Microsoft Azure and Azure DevOps to handle deployment pipelines, monitor services, and simplify workflows.

Black Knight, Inc. | AngularJS, .NET, Azure DevOps, SQL

May 2023 – Sept 2023

Software Engineering Intern (Full Time)

Jacksonville, FL

- Created APIs using C# and built endpoints that improved security and prevented unauthorized access from former employees.
- Used SQL skills to handle complex database operations, boosting the overall efficiency and performance of the solution.
- Developed and repaired unit tests and regression tests, increasing code coverage by over 30% for the solutions.

SOFTWARE PROJECTS

Robotic Arm Arduino Project

Nov 2025

- Built a 3D-printed robotic arm using C++, Arduino IDE, and Arduino Uno, integrated with servo motors to enable precise movement.
- Developed control logic to coordinate servo movement and sensor input, supporting tasks like pick-and-place and hardware control.

Memory Garden Storage Tool

Oct 2025

- Built a platform using React, Express.js, and MongoDB with Auth0. It helps users manage their device storage through a secure interface.
- Integrated an AI model that analyzes stored items and groups them into keep or trash categories to simplify storage cleanup.

Climate Predictor App

May 2025

- Created a visually engaging UI with dynamic map integration using React to help audiences understand climate data easily.
- Built a linear regression model using normalized historical climate data to predict long-term changes in weather using Python.

RAG Based Study Tool

April 2025

- Built a UI with a quiz generator based on machine learning, using RAG and LLMs to create questions from PDF study materials.
- Developed a Docker-based pipeline for vector embedding, semantic retrieval, and quiz content generation.
